

## CAGED for Ukulele Cheat Sheet

Use these diagrams to practice the CAGED system for ukulele. Pick a chord progression, and then discover new ways to play it by picking a chord shape and then placing it on the neck with the red dot over the correct root note.

For example, you can play a C chord in the C shape with the red root note on the 3rd fret of the A string. You can also play a C chord using the A shape with the red root note on the 4th fret of the G string; or use the F shape with the root on the 8th fret of the E string.
